

2009 Annual Report

We are so very pleased that you remain committed to be a partner and participant with CAREERS to provide essential and valued career exploration opportunities for Alberta youth. Together, our vision is to ensure that Alberta's youth experience career success through building a sustainable and high quality worker skills base for community economic prosperity.

Throughout this report you will see many examples of how CAREERS has become a provincial catalyst with education, industry, community and Aboriginal leaders, and government to produce highly effective and efficient models for student career choice and experiential success. The many 'pop-ups' within the report share the highlights and stories of student, employer and educator success.

These significant results come about by making transformation happen through the efforts of many partners like schools, industry workplaces, government and many supporting investors. Your continued support to include our youth in the career development and training efforts facilitated by CAREERS will ensure that our Alberta workplaces have a highly talented worker skills pool to meet the progressive challenges of global competitiveness. Indeed, this is '*a future worth working for...*'

As a part of our commitment to good fiscal stewardship, the environment and our expanding readership, we have greatly reduced our printed copies of the CAREERS: The Next Generation 2009 Annual Report. You can find it online at [2009 Annual Report](#). Should you wish to obtain a hardcopy or have any questions or comments, please contact our Stakeholder Relations Office at 780.930.2523.
